

WARRANTY:

When properly installed and under normal conditions of use, all Livex Lighting products are warranted to be free from defects in materials and workmanship for one (1) year from date of invoice. Improper lamping may result in damage and will void the Livex Lighting warranty.

OUTDOOR LIGHTING WARRANTY:

Finishes for fixtures installed outdoors are subject to change due to prolonged exposure to sunlight, pollutants and other environmental conditions. Metal finishes on outdoor fixtures will naturally mature over time, changing in appearance and creating a living finish. Painted finishes on outdoor fixtures may naturally fade over time, depending on the fixture's exposure to the outdoor elements. Thus any claim for fading, discoloration or "patina" of a finish on an outdoor fixture is not applicable to our warranty. Due to the reasons described above, this warranty does not cover the following finishes: Antique Brass -01, Polished Brass -02, Polished Chrome -05, Natural Brass -08, Satin Brass -12 and Brushed Nickel -91.

COASTAL ENVIRONMENTS:

The environment within ten miles of a sea coast can be extremely corrosive. Even with the appropriate maintenance, products installed in this environment will typically deteriorate more than products installed in a less severe environment. Some corrosion and/or deterioration is considered "normal wear" in this environment. Thus, any claim for finish failures or for corrosion of other components due to coastal environment conditions is not applicable to our warranty.

CARE & MAINTENANCE

Do not use any harsh abrasives, polishes or chemicals! Do not wash any glass or parts in the dishwasher!

FINISH CARE & CLEANING:

Initial care for finishes requires only periodic cleaning with a soft cloth, dampened with water. A mild non-abrasive soap may be used along with a soft cloth and water if the fixture is very dirty. Particular care should be taken to avoid abrasive materials and strong cleaning agents as they will quickly destroy the protective coatings and subject the finish to rapid oxidation and/or discoloration.

FABRIC SHADES

Use a fine brush or a lint remover on your shade to remove the accumulated dirt and dust. If necessary, you may use a white cloth dampened with a mild solution of soapy water to wash the shade gently and evenly. Rinse thoroughly with a white cloth dipped in clean water. The shade should be allowed to dry quickly, preferably in the sun or by using a hair dryer. You may also use a home dry cleaning product.

GLASS SHADES

Use a clean, soft cloth to wipe your shade. If necessary, you may use a white cloth dampened with a mild solution of soapy water to gently wash the shade. Rinse thoroughly with a white cloth dipped in clean water. A mild glass cleaner may also be used.

OUTDOOR FIXTURES

Finishes on Outdoor Lanterns must be properly maintained and treated. Use a clean, soft cloth to wipe the fixture.

To help preserve the finish, a high quality car wax may be applied to the metal twice a year. A glass cleaner may be used to clean the glass only; do not use the glass cleaner on any part of the fixture.
